APPLICATIONS

應用場景

- 海水浴場、風景區水域、遊艇碼頭等公共水域。
- 營隊活動、戶外拓展訓練。
- 水上運動比賽現場安全防護。
- 軍事演訓、戰術渡河行動安全輔助。

- Public waters such as beaches, scenic water areas, and yacht marinas.
- Camp activities and outdoor adventure training.
- On-site safety protection for watersports competitions.
- Safety assistance for military exercises and tactical river-crossing operations.

ABOUT

現有的被動式救援方式，已難以滿足迅速且精準的救援需求。為提升救援效率，減少溺水悲劇，本計畫擬整合「智慧型遙控救生圈」與「RF Explorer系統」，打造具備自動感知、智能判斷並主動出動的智慧水域

主動式救援系統。

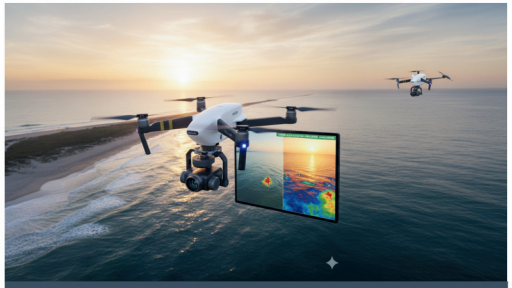

INCREASE THE SUCCESS RATE OF RESCUE OPERATIONS.

The existing passive rescue methods are no longer sufficient to meet the demand for rapid and precise rescue. To improve rescue efficiency and reduce drowning tragedies, this project plans to integrate a "Smart Lifebuoy" with an "RF Explorer System" to create an intelligent, proactive aquatic rescue system that can automatically sense, intelligently assess, and actively deploy.

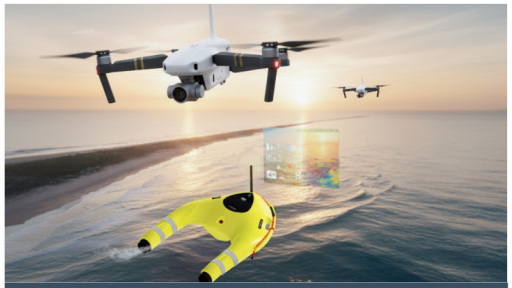

SOLUTION

AI 熱源判讀

RF 設備燈號指引待救者方位

遙控救生圈自動航向RF目標位置
